How to uninstall earlier versions of xllogger before installing a new version

NOTE *The current version of xllogger (and future versions) will update automatically using a new installer. However, previous versions operated in a different way and need the xllogger menu to be removed from Excel, then the xllogger program to be uninstalled using the Windows Control Panel. Your computer should then be restarted before installing the current version of xllogger.*

Follow the detailed instructions below according to the version of Office that you have been using.

Office 2010 or 2013

1. **Remove xllogger from the ExellAddIn list as follows:**
    a. Open Excel
    b. Click the File tab (top left)
    c. Click Options
    d. Click Add-Ins (on left)
    e. Click Go at the bottom (next to 'Manage Excel Add-Ins')
    f. Deselect xllogger
2. **Uninstall the files as follows:**
    a. Go to Control Panel and uninstall xllogger in the usual way
3. **Restart your computer before installing the new version of xllogger**

Office 2007

1. **Remove xllogger from the ExellAddIn list as follows:**
    a. Open Excel
    b. Click the Office button (top left)
    c. Click Excel Options
    d. Click Add-Ins (on left)
    e. Click Go at the bottom (next to 'Manage Excel Add-Ins')
    f. Deselect xllogger
2. **Uninstall the files as follows:**
    a. Go to Control Panel and uninstall xllogger in the usual way
3. **Restart your computer before installing the new version of xllogger**

Other previous versions of Office

1. **Remove xllogger from the Excel AddIn list as follows:**
    a. Open Excel
    b. Go to Tools/AddIns and then deselect xllogger
2. **Uninstall the file as follows:**
    a. Go to Control Panel and uninstall xllogger in the usual way
3. **Restart your computer before installing the new version of xllogger**
